Portfolio: <https://lydia-portfolio-indol.vercel.app/>

PROFESSIONAL SUMMARY

Full-Stack Software Developer with experience designing, developing, testing, and deploying applications using Java, TypeScript, JavaScript, Python, React, Next.js, Node.js, Django, and FastAPI. Proficient in REST APIs, SQL and NoSQL databases, cloud deployment, authentication systems, and ERP integration. Dedicated to building scalable, secure, and user-friendly solutions while leveraging strong analytical and business problem-solving skills.

EDUCATION

Bachelor of Economics

University of Nairobi

2021 - 2025 | Nairobi, Kenya

COURSES & CERTIFICATIONS

Relational Databases -FreeCodeCamp

Full-Stack Development - FreeCodeCamp

Python - FreeCodeCamp

JavaScript & TypeScript Advanced - Udemy

Responsive Web Design - FreeCodeCamp

AI Foundations Associate - Oracle University

ITSM Foundation Training

IT Support Technical Skills Bootcamp

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript, PHP, SQL

Frontend: HTML, CSS, React.js, Next.js

Backend: Node.js, Express.js, Django, FastAPI

Databases: MongoDB, Mongoose, PostgreSQL, MySQL

Tools & Technologies: Git, GitHub, Genexus, Docker, AWS, Vercel, Render, Prisma ORM

APIs & Auth: REST APIs, GraphQL, JWT, OAuth, WebSockets

Other: CI/CD, Postman, Figma

PROJECTS

Tremile Manufacturing System

Developed a manufacturing and ERP management system for managing raw materials, inventory, production, costing, and expenses, with integrated worksheets for production and cost tracking. The system streamlines operational workflows, improves inventory and production tracking, and supports more efficient management of manufacturing processes.

Logpagia - Enterprise Platform

Collaborated with a team of developers to build an AI-powered enterprise platform integrating workforce management, financial intelligence (AP/AR), inventory systems, and analytics into a single ecosystem. Improves efficiency, financial processes, and allows data driven decision-making across business functions.

LejaFlow - Business Management Platform

Full-stack SaaS application for managing finances, inventory, and services with an integrated admin dashboard. It improves financial tracking, operations, and decision making for small and medium-sized businesses.

Recipe Finder

A web application that helps users discover recipes based on available ingredients. Reduces food waste and simplifies meal decisions.

E-commerce Platforms (WakaWears & Masgas)

Developed full-featured online stores with admin dashboards for managing products, orders, and customers. Improved inventory management and expanded business reach.

Crypto Tracker App

Built a real-time currency tracking and conversion application. Provides accurate exchange rates for users and travelers.

PROFESSIONAL EXPERIENCE

ICT Intern | Madison Group Limited

Feb 2026 - Sep 2026 | Nairobi, Kenya

- Provided first-line ICT support for hardware, software, application, system access, and connectivity issues.
- Supported ERP and enterprise business applications, assisting users with application issues, navigation, access, and troubleshooting.
- Troubleshoot technical and application issues, resolved common incidents, and escalated complex issues to the appropriate ICT or technical teams.
- Assisted with API development and integration to support business processes and improve application workflows.
- Participated in application testing, debugging, and issue investigation, including working with GeneXus for enterprise application development and maintenance.
- Collaborated with ICT staff, developers, and business users to investigate issues, identify root causes, and improve application functionality.

Software Developer | Logpagia Technologies LLC

2025 - 2026

- Collaborated with developers to design, develop, test, and maintain enterprise software applications.
- Contributed to an AI-powered enterprise platform supporting workforce management, finance, inventory, and analytics.
- Developed and maintained frontend/backend features involving APIs, databases, authentication, and business workflows.
- Conducted functional and black-box testing, documented defects, and supported debugging and issue resolution.
- Supported testing and validation of healthcare and revenue-cycle management software, working across different user roles and business workflows.

Web Developer | Ndifin | 2024 - 2025

- Develop and deploy scalable full-stack applications with authentication systems, dashboards, and e-commerce features. Collaborate with teams to deliver customized client solutions.

Intern | Jimali Ventures | 2024

- Assisted in building and maintaining full-stack applications using Django and React. Worked on debugging, API integration, and internal tool improvements.
